PROFILE

Results-oriented professional with a passion for IT. I am a **proactive problem solver** with a commitment to delivering exceptional results and also a **excellent teamwork** and **communication** with my colleagues. With a **keen eye for detail** and **dedication to learning continuous**, I constantly stay up to date with industry trends . My collaborative nature and **communication skills efficient** allow me to work seamlessly within **cross-functional teams** and **build strong** relationships with clients. I am now looking for a new challenge where I can use my expertise.

EDUCATION

February 2019 – February 2023
Nicosia, Cyprus

European University Of Lefke, Bachelor's in Computer Engineering [🔗](#)

Ben Arous, Tunisia

Bougarnine High School, IT

PROJECTS

May 2024 – July 2024

Product_List_App

I developed a product list app using HTML, CSS, and JavaScript, showcasing my web development skills. This app allows users to add, edit, and delete products efficiently. The project demonstrates my ability to create dynamic and user-friendly web applications.

February 2024 – April 2024

Design Slider

Created a dynamic design slider website using HTML, CSS, and JavaScript. Implemented smooth transitions and interactive elements for an engaging user experience. Focused on responsive design to ensure functionality across various devices.

September 2022 – December 2022

Computer Based Lottery, Graduation Project

- Developed an online lottery website using cryptocurrency.
- Represent the entire system and define the entity based on scope(boundaries and relationships).
- Implementation of the design strategy.
- Writing technical documentation of the code.
- I learned how to use new software such as “Thirdweb” and “Metamask” to include cryptocurrency in the project.

PROFESSIONAL EXPERIENCE

August 2023 –
November 2023
Antalya, Turkey

Blue Green Dental Clinic, Call Agent and coordinator

- Advertise the deals and packages offered by the clinic and advertise them on Facebook and Instagram.
- Make a list of patients who applied to an ad.
- Calling patients from (France, England, United States) who wish to repair their teeth.
- Welcoming patients from another country to the clinic to repair their teeth
- Coordination and translation between the patients and the dentist and surgeon in order to get the best treatment for the patient

July 2021 –
August 2021
Turkey

TURABEXPO, Assistant of Data Base Engineer

- Organization and storage of customer data in a secure database.
- Regular database maintenance to ensure data integrity and information availability.
- I used "Entity Relationship Diagram" to plan the database design and collaborate with work members.
- I used ERD to represent how information and object with system can be related to each other.
- Use case diagram/sequence diagram/class diagram design.
- Technologies used: SQL / SQL Server / MySQL

June 2018 –
August 2018
Tunis, Tunisia

Bits Informatique, Software Engineer Intern

- Custom software and mobile application development service.
- Installing software on new computers for large businesses
- Configuration of the software to optimize its use and efficiency.
- I obtained a paid internship during the first year of volunteer experience as part of my graduate program

October 2017 –
April 2018
Tunis, Tunisia

Concentrix, Customer Advisor

- Communicate with customers by telephone and mail.
- Provide comprehensive product/service information and support to customers.
- Look for cross-selling opportunities to increase the value of individual purchases and overall sales.
- Identify opportunities to improve the customer experience and turn dissatisfied customers into satisfied customers.
